Credit Suisse Fund Management S.A., 5, rue Jean Monnet, L-2180 Luxembourg

Objectives and investment policy

The Fund invests at least two-thirds of its assets worldwide in inflation-indexed debt instruments, bonds (including fixed rate bonds, inflation-linked bonds, zero-coupon bonds, covered bonds, government and semi-government bonds), notes (including floating rate notes), similar fixed-interest or floating-rate securities (including securities issued on a discount basis) which have a minimum credit rating of BBB- (Standard & Poor's) or Baa3 (Moody's). The Fund promotes environmental, social and governance (ESG) characteristics (within the meaning of Article 8 of Regulation (EU) 2019/2088) through a combination of exclusions, ESG integration and active ownership. The most material ESG factors are combined with traditional financial analysis to calculate an ESG integrated credit rating, which serves as the basis for a bottom-up security selection process. This Fund aims to outperform the return of the Bloomberg World Inflation-Linked 1-10Y (Hedged into USD) benchmark. The Fund is actively managed. The benchmark is used as a reference point for portfolio construction and as a basis

for setting risk constraints. The majority of the Fund's exposure to bonds will refer and have similar weightings to the benchmark. The Investment Manager may use its discretion to invest in bonds not included in the benchmark in order to take advantage of specific investment opportunities. It is thus expected that the performance of the Fund will to a limited extent deviate from the benchmark. The Fund may use derivatives to achieve the above aims. The Fund uses derivatives to reduce the impact of changes in currency exchange rates on the performance for this Share Class. The investor can buy or sell shares of the Fund on a daily basis, as further defined in the prospectus. This Share Class does not make distributions. The Fund shall bear the costs of standard brokerage and bank charges incurred by the Fund through securities transactions in relation to the portfolio. These charges are not included in the "Charges" section of this document.

Risk and reward profile

Risk profile

The Fund's risk and reward profile shows the variations in value an investment in this Fund would have undergone over the past five years, whereby simulated performance data is used in the case of missing history. The Fund's risk rating may change in the future. Please note, higher possible gains generally also mean higher possible losses. The lowest risk category does not mean that the Fund is risk free.

Why is the Fund in the specific category?

Investments in bonds are affected by changes in interest rates, the size of the market segment, the currency allocation, the economic sector and the credit quality of the bonds. The Fund holds mainly investments with generally good credit quality. However, the Fund may be exposed to currency risk. The use of derivatives may lead to leverage and to an amplified reaction to market movements. The Fund's application of Swing Pricing also impacts its risk and reward profile.

Are there any other particular risks?

The Fund's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the Fund has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Credit risk: Issuers of assets held by the Fund may not pay income or repay capital when due. The Fund's investments generally have low credit risk.
- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. However, this Fund's investments should generally have good liquidity.
- Counterparty risk: Bankruptcy or insolvency of the Fund's derivative counterparties may lead to payment or delivery default. The Subfund will endeavor to mitigate this risk by the receipt of financial collateral given as guarantees.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks. Investments in less developed financial markets may expose the Fund to increased operational, legal and political risk.
- Sustainability risks: Sustainability risks are environmental, social or governance events or conditions can have a material negative effect on the return, depending on the relevant sector, industry and company exposure.

Charges

One-off charges taken before or after the investment	
Entry charge	5.00%
Exit charge	Not applicable
Conversion charge	2.50%
This is the maximum amount that may be deducted from the investor's money before it is invested or before the proceeds of the investment are paid out.	
Charges debited to the Fund over a year	
Ongoing charge	1.18%
Charges debited to the Fund under certain specific conditions	
Performance fee	Not applicable

Charges debited to investors are used to pay for the cost of running the Fund, including marketing and distribution costs. These charges reduce the potential growth of the investment. For detailed information about the charges, investors should refer to chapters "CS Investment Funds 1 – Summary of Share Classes" and "Expenses and Taxes" of the prospectus, which is available at www.credit-suisse.com.

The **entry** and **exit charges** shown are the maximum figures that can be charged to the investor. Investors may obtain the fees effectively applied from their individual financial adviser or distributor.

The **ongoing charges** figure is based on last year's expenses for the year ending October 31, 2021. This figure may vary from year to year. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the Fund when buying or selling shares/units in another collective investment undertaking.

The single swing pricing method (SSP) is used to determine the issue and redemption price of the Fund. For further information about the implication of SSP, investors should refer to the relevant chapter "Net Asset Value" of the prospectus, which is available at www.credit-suisse.com.
